

MAKE THE JOURNEY AS EXCITING AS THE DESTINATION.

Exciting job opportunities awaiting PhDs and M.Tech graduates. At Saint-Gobain Research India (SGRI).

At Saint-Gobain Research India (SGRI), we strongly believe that the way in which you achieve your career goal should be as exciting as achieving it.

Established in 2012, SGRI was added as the 7th main R&D center of Saint-Gobain located at Chennai, India. This new R&D center supports existing businesses and helps create new businesses to further strengthen and fuel growth for Saint-Gobain in the region.

Key focus areas

- Abrasives, Ceramics, Plastics and Reinforcements
- Glass for Architecture and Automotive
- Advanced Engineering & Design
- Relevant Applications Technology for the businesses
- Habitat Solutions for Hot-Humid Climates

Saint-Gobain, the world leader in habitat and construction markets, designs, manufactures and distributes building materials, providing innovative solution to the challenges of growth in both emerging and mature markets with a focus on energy efficiency and environmental protection. The ambition of Saint-Gobain is to be the reference in the sustainable habitat markets.
